### **DETAILED ACTION**

Claim 30 is an improper dependent claim because it does not identify the claim from which it depends. To advance the prosecution, claim 30 is treated as being dependent from claim 1.

#### ***Election/Restrictions***

1. Restriction to one of the following inventions is required under 35 U. S. C. 121:

The product claims 1-43 will be examined along with the elected invention of Group I or Group II (MPEP § 806.05(i)).

- I. Claims 44-50, drawn to a method of treating a condition where inhibition of thrombin is required by administering the compound of formula I, or the use of the compound of formula I in the manufacture of a medicament for the treatment of a condition where inhibition of thrombin is required, classified in class 514, subclass 18.
  - II. Claim 51, drawn to a method of preparation of the compound of formula I, classified in class 514, subclass 18.
2. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are different processes- one of using the product and one of making the product, which use different materials and have different results. The practice of the process of Group I does not require the process of Group II. Since the product does not appear allowable, restriction is proper between said method of making and method of using.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by the recognized divergent subject matter, and because

Art Unit: 1653

Inventions I and II require different searches but are not co-extensive, examination of these distinct inventions would pose a serious burden on the examiner and therefore restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

A telephone call was made to Leonard Mitchard on August 11, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.
